NFPA 70E requires workers to be outfitted in Flame Resistant Protective Clothing that meets the requirements of ASTM F1506 when there is a possible exposure to Electrical Arc Flash. The short duration and intense energy presents a unique safety hazard. Employers must assess the potential hazard and determine the flash protection boundary distance. Guard-Line's Protective clothing has been designed to meet standards, as outlined, for a particular Hazard Risk Category with a minimum ATPV Rating of the value, noted in the Protective Clothing Characteristics section. It has been confirmed by OSHA that garments which meet the requirements of ASTM F1506 are in compliance with OSHA 29 CFR 1910.269.
